

ServiceNow ITGRC

You already own ServiceNow ITGRC – why not leverage it?

ServiceNow ITGRC provides:

- Cohesive and actionable dashboards, reports, and data that are always current and representative of your environment.
- Standard, repeatable processes and workflow automation that allow you to direct strategic focus toward your business.
- Automation of previously labor-intensive tasks, such as gathering audit material, managing audits and demonstrating compliance.
- Native and 3rd party integrations.

Covestic uses a flexible, proven solution framework to help your organization achieve maximum results from ServiceNow ITGRC. We analyze your unique needs and design a ServiceNow ITGRC solution that's just right for you. We don't approach ITGRC projects with an expectation that GRC processes and requirements are already optimized for ServiceNow. Rather, we eagerly support process optimization and requirements efforts to ensure they are tuned to your unique needs and ServiceNow's capabilities.

About ServiceNow

Most organizations manage IT Governance, Risk and Compliance (GRC) activities with expensive, standalone tools or manually via documents and spreadsheets. ServiceNow customers have an inexpensive, integrated and process-driven option for ITGRC. ServiceNow ITGRC is a powerful GRC management solution that's included with every ServiceNow subscription. Because it's built on the same extensible technology as the rest of ServiceNow, ITGRC seamlessly integrates with the rest of the solution and maximizes your ServiceNow investment.

Covestic & ServiceNow

Covestic is a ServiceNow Authorized Partner. We apply over a decade's service management know-how to readying your people, processes and tools for a successful implementation that is not just accepted by its users, but embraced. We don't approach projects expecting fully-defined requirements – we partner with you to architect and engineer solutions that work today and scale for tomorrow.

Let's Begin

We're passionate about freeing your organization from standalone, expensive tools and manual processes.
